CURRICULUM VITAE

Sagar Sharma

Profession	Growth and marketing analytics, with strategy and business analysis
Availability	Open to new roles (PGDM completed April 2026)
Residence	Delhi — open to relocation
Contact	+91 77259 41004 · sagar380208@gmail.com · linkedin.com/in/sagar0sharma · sagar380208-sh.github.io

1. Key qualifications

PGDM graduate in Marketing & Strategy (IMT Nagpur, 2026) with a commerce foundation and a hands-on analytics stack. Currently a Polycab India trainee on the Territory Sales Manager track. Combines consumer and go-to-market strategy with SQL, Tableau, Power BI and Python. The evidence behind that is specific: three internships across EdTech and real estate; 200+ user interviews personally conducted for a product-strategy concept; a medallion data warehouse, interactive dashboards and a Power BI model rebuild; and 28 independent strategy case studies across FMCG, D2C, quick commerce, retail, telecom and EVs.

- **Research & insight:** user interviews, focus groups, surveys, diary studies and social listening, turned into personas, occasions and positioning.
- **Data & BI:** data warehousing (Bronze/Silver/Gold), star-schema modelling, advanced SQL, Tableau and Power BI dashboards, Python correlation analysis.
- **Strategy & GTM:** market entry, brand and portfolio architecture, pricing, unit economics, TAM/SAM/SOM, scenario and ROI modelling.
- **Working style:** states hypotheses before testing them, reports results that contradict them, and labels estimates as estimates.

2. Education

Period	Institution	Qualification	Result
2024 – Apr 2026	Institute of Management Technology (IMT), Nagpur	Post Graduate Diploma in Management (Marketing & Strategy)	75.4% (CGPA 6.93/10)
2018 – 2021	S.S. Jain Subodh College, Jaipur	Bachelor of Commerce (B.Com)	65% aggregate

Relevant coursework: Strategy, Competitive Analysis, Marketing Analytics, Consumer Behavior, Brand Management, Business Economics, Financial Management.

3. Employment record

Period	June 2026 – present
Employer	**Polycab India Ltd** — wires and cables, lighting, fans and switchgear · Delhi
Position	Trainee, Territory Sales Manager track (Lighting, then Wires & Switchgear, current posting)
Duties	• Listed outlets across East Delhi, North Delhi and Bhagirath Palace that had never stocked Polycab lighting, pitched owners directly and followed up until the first order was placed through a distributor. • Planned daily beats around outlet productivity, at 10+ outlet visits a day, working with 2 distributors. • Built an HTML tool showing price points, scheme slabs, scan points and deductions for any order size. • Designed zone-wise retailer WhatsApp groups recognising the monthly top 3 sellers of key SKUs (self-initiated; proposed, not yet run).
Accomplishments	• Converted **15+ new outlets**; personal sales grew **about 20% month on month**. • Deals calculated and negotiated in the meeting itself, an **estimated 35% faster** than by hand.

Period	April 2025 – June 2025
Employer	**Hanbai Consultancy LLP** — EdTech and management training · Mumbai (in-office)
Position	CEO's Office Intern (formal, faculty-supervised Summer Internship Project)
Duties	• Conducted user interviews, focus groups and a survey for **IIMX**, an AI-powered management-education platform for Indian professionals. • Specified three learner personas — Learning Head Prashant (B2B), Corporate Learner Raj (B2B2C), Ambitious Student Ananya (B2C) — each with budget, usage pattern and decision process. • Built a structured AI-prompt content framework (role definition, instructions, good/bad examples, standard format and constraints) and used it to produce 900+ management modules and worksheets grounded in Indian business cases. • Designed an AIDA launch funnel: content marketing for awareness; email plus a 50%-locked sample worksheet for interest; heat-map-triggered full worksheets and share-gating for desire; a monthly plan and 7-day free trial for action. • Benchmarked against Coursera and other online platforms to define the product's differentiating factor; conceived a peer-learning virtual-workshop concept from a survey insight that introverted learners and English learners will speak to a phone, not a room (concept and GTM design — not built or launched). • Created research questionnaires, analysed trending topics to select focus topics, and designed a structured workstream with proposed launch criteria.
Accomplishments	• In focus-group validation, **20–25% of targeted leads** converted; **5–10% weekly engagement growth** during trial, compounding to ~40% over the trial period. • Self-initiated a go-to-market strategy as a competitive contingency; presented it to a **5–7 member board review**, which endorsed it to proceed if the product launched.

Period	March 2025 – May 2025
Employer	**To-Let Globe** — real estate · Remote
Position	Business Strategy Intern — Team Lead (3-member team)
Duties	• Led the team in designing an integrated growth strategy across digital channels and in implementing targeting logic. • Built performance dashboards and ran market research to identify scale levers. • Served as the continuing point of contact for the strategy workstream while the role remained unfilled, working remotely alongside a full-time Mumbai internship. • Diagnosed lagging public employer reviews as a lagging indicator of a problem already fixed; designed a one-week employee-feedback pilot and proposed a six-month internal-feedback workstream (post-project reviews, multi-stakeholder escalation ladders).
Accomplishments	• Brand reach **+105%** and qualified leads **+60%**, measured on the dashboards built. • **12 growth opportunities** identified and adopted by leadership.

Period	January 2025 – March 2025
Employer	**To-Let Globe** — real estate · Remote
Position	Brand Strategy Intern
Duties	• Analysed customer feedback to find the sources of weak brand perception. • Redesigned the brand framework and implemented KPI tracking to maintain consistent brand execution across channels.

4. Selected assignments — data & analytics

Self-directed builds on real datasets. Rates and counts are as computed in each project.

Project	Situation	Outcome
SQL Data Warehouse SQL	Sales data lived in disconnected CRM and ERP systems — no single point of truth.	In this self-directed build, report preparation moves from weeks of manual work to minutes, with a governed data catalogue and lineage.
HR Analytics Dashboard Tableau	HR managers needed one tool to track employee lifecycles and departmental performance.	A 15-chart interactive dashboard on Tableau Public. It surfaced a pay-gap pattern in which female PhD holders in the dataset earned ~25% more than male counterparts — an observed pattern in this dataset, not a general claim.
Power BI Star Schema Power BI	An inherited model had many-to-many relationships and circular filter directions, producing wrong numbers.	File size cut 20% by removing redundant hash keys; a centralised measures table standardised reporting.
Movie Revenue Correlation Python	Which features — budget, genre, production company — most drive a film's gross revenue?	The hypothesis failed. Budget and user votes showed the strongest correlation with revenue (0.7+); production-company influence was statistically low. I follow the evidence, not the prior.
COVID-19 Exploration & Dashboard SQL + Tableau	A global COVID-19 dataset with mortality and vaccination data, in inconsistent types.	~2% global death rate among confirmed cases (deaths ÷ confirmed cases); ~10% of the US population infected (infections ÷ population). Published on Tableau Public with regional drill-down and a year-end forecast.
Nashville Housing Cleaning SQL	56,000+ raw property records with inconsistent date formats, missing addresses, comma-packed address strings and duplicate rows.	104 duplicate entries removed with CTEs and window functions — a fully usable dataset.
EDA & Data Profiling SQL	A new sales database of customers, products and orders — over $29M in revenue across 18,000+ customers — with no documentation.	100% of registered customers had placed orders; the Bikes category drove 69% of total revenue.
Customer Segmentation SQL	Sales tracking existed; behavioural insight didn't.	"New" was the largest segment at 14,000 customers — enabling lifecycle-stage targeting.
Sales Performance & YoY Tableau	Stakeholders needed to compare sales year over year to see seasonality and growth.	An interactive executive tool for deep-dives into weekly trends and profit discrepancies.
Domestic Hotels MIS SQL · Excel · Dashboard	A domestic-hotels category team needs to know where supply is deep, where quality is slipping and which listing gaps cost bookings. The only data available was a public scrape — no prices, no bookings, no GMV.	Parking, pool and accessibility were listed by 0% of properties in every market, breakfast by 33% blended, and Jaipur had 3 of its 8 properties rated below 3.0 — the worst tail risk in the set. Goa carried 31 of the 58 properties, with a fix-or-delist watchlist of those rated under 3.5. Prices, GMV and conversion are not in the source, so none are reported.

5. Selected assignments — strategy case studies

Independent academic case studies and reports, not client engagements. All forward-looking figures are estimates, projections or market-sizing — not realised results.

Case study	Focus	Methods
Ather Energy	Tier-2/3 expansion strategy · Electric two-wheelers	Market sizing · Market expansion · Scenario modelling · NPV / IRR
Blinkit	Growth-marketing ROI · Same spend, different shape	Growth marketing · Funnel and cohort analysis · Unit economics (CAC / LTV) · Retention / CRM
Eternal × Blinkit	Post-merger integration · A 12-month playbook	Post-merger integration · Minto pyramid · Value-capture ledger · Competitive analysis
Snitch	Segmentation & positioning · D2C menswear	Segmentation & targeting · Positioning · Perceptual mapping · 4Ps

Case study	Focus	Methods
Vodafone Idea (Vi)	Profitability turnaround diagnostic · Telecom	Turnaround strategy · Profit tree · EBITDA bridge · Peer benchmarking
ZINGA	Pricing & go-to-market · Premium D2C snacks	Pricing strategy · Willingness to pay · Channel economics · Go-to-market
Zepto	Enterprise GTM Playbook · Quick commerce	Unit economics · GTM playbook · Private label · CAC payback
VIP Bags	Project R-30 · Rajasthan zone turnaround	P&L diagnosis · Inventory strategy · Channel strategy · Product mix
Bournvita · Knorr · Glucon-D	Occasion expansion trilogy	Social listening · Occasion strategy · TAM / SAM / SOM · Sub-brand design
Google Calendar	Independent case study · Product strategy · Productivity OS	User research · Product strategy · Product architecture · Competitive analysis
Bikaji Foods	Revenue diversification & brand architecture	Brand architecture · Portfolio strategy · Financial modelling · GTM roadmap
India Cleanliness Movement	Viral growth strategy · Behavioural economics	Behavioural economics · Creator economy · Growth loops · Campaign design
Asian Paints	Home Care 360 · Category expansion	Category strategy · Market sizing · Diversification · Consumer journey
Bata	Youth-centric brand transformation	Brand repositioning · Gen Z strategy · Product architecture · Digital GTM
Bournvita (Mondelez)	₹500 Cr turnaround strategy	Root-cause analysis · Funnel analysis · Portfolio reformulation · Financial modelling
Nestlé Maggi	₹1,200 Cr growth strategy	Retention analysis · Regionalisation · Revenue modelling · Omnichannel GTM
Reckitt / Dettol	Oral care market entry	Market entry · TAM / SAM / SOM · Portfolio design · Full-funnel GTM
Vadilal	Challenger brand audit vs Amul	Brand audit · SWOT · Portfolio architecture · Distribution strategy
Motul India	5-year strategic expansion	Market entry · Competitive moats · Scenario modelling · D2C strategy
General Mills	Honey Nut Cheerios · India GTM	Market entry · GTM strategy · Pricing architecture · Consumer insight
EssilorLuxottica	Tier 2/3 cluster expansion	Distribution strategy · Channel architecture · Pricing · KPI design
Dabur	Portfolio-led growth · Ayurveda repositioning	Portfolio architecture · Innovation pipeline · Premiumisation · Multi-channel GTM
Nivea Men	90-day Instagram growth strategy	Social strategy · Creator operations · Content strategy · Engagement design
CeraVe	Super Bowl campaign deconstruction	Campaign analysis · Behavioural economics · Funnel design · Brand equity
Hindustan Unilever	Market benchmarking · Redseer IMPACT framework	Market benchmarking · Scenario modelling · Channel analysis · Competitive positioning
Nani's Kitchen	Mock brand launch · Premium ready-to-cook masala	Brand launch · Positioning · Product strategy · D2C GTM
boAt	Brand audit · Audio & wearables	Brand audit · Positioning map · Competitive analysis · Brand architecture
Cadbury × SRK	Campaign deconstruction · Diwali 2021	Campaign analysis · Insight hierarchy · Creative strategy · Brand purpose

6. Technical competencies

Databases & SQL	SQL Server — stored procedures, BULK INSERT, TRY…CATCH, CTEs, temp tables, views, self-joins, window functions (ROW_NUMBER, LAG, SUM OVER), INFORMATION_SCHEMA
BI & visualisation	Tableau (LOD, parameters, dual axis, heat maps, Tableau Public) · Power BI (Power Query, DAX, row-level security, star schema) · Figma (dashboard layouts)
Python	Pandas, Seaborn, Matplotlib, Jupyter — cleaning, correlation, hypothesis testing
Office	Excel (financial and ROI modelling, scenario models) · PowerPoint
Analytical methods	Data cleansing, profiling, segmentation, funnel and 5-Why analysis, TAM/SAM/SOM, SWOT, scenario modelling, social listening, competitive benchmarking

7. Training and certification

- Google Data Analytics (Coursera) — SQL, data visualisation
- Advanced Excel for Business
- Leadership Skills — IIM Ahmedabad
- Inbound Marketing — HubSpot Academy
- Data Driven Decision Making — PwC

8. Honours and awards

- Winner — STRATBUZZ Business Strategy Competition (2024)
- 2nd Runner-Up — DRISTICONE Case Analysis Challenge (2024)
- Anundoram Borooah Award (2015) — awarded out of 3.89 lakh students

9. Leadership and community

Position	**General Secretary — Centre for Sustainability, IMT Nagpur** (2024–2026)
Duties	• Ran a QR-based digital campaign that increased engagement by 30%, reaching 200+ people. • Organised a campus event using audience segmentation; participation rose 20%. • Coordinated a 10-member team across stakeholder logistics for a sustainability event.
